Important risk information

Investing involves risk, and you could lose money on an investment in SPDR® Gold MiniSharesSM Trust ("GLDMSM" or "GLDM"), a series of the World Gold Trust.

ETFs trade like stocks, are subject to investment risk, fluctuate in market value and may trade at prices above or below the ETFs' net asset value. Brokerage commissions and ETF expenses will reduce returns.

Commodities and commodity-index linked securities may be affected by changes in overall market movements, changes in interest rates, and other factors such as weather, disease, embargoes, or political and regulatory developments, as well as trading activity of speculators and arbitrageurs in the underlying commodities.

Frequent trading of ETFs could significantly increase commissions and other costs such

that they may offset any savings from low fees or costs.

Diversification does not ensure a profit or guarantee against loss.

Investing in commodities entails significant risk and is not appropriate for all investors.

Important Information Relating to GLDMSM:

The World Gold Trust has filed a registration statement (including a prospectus) with the Securities and Exchange Commission ("SEC") for the offering to which this communication relates. Before you invest, you should read the prospectus in that registration statement and other documents the World Gold Trust has filed with the SEC for more complete information about GLDM and this offering. Please see the GLDM prospectus for a detailed discussion of the risks of investing in GLDM shares. When distributed electronically, the GLDM prospectus is available by clicking here. GLDM is not an investment company registered under the Investment Company Act of 1940 (the "1940 Act") and is not subject to regulation under the Commodity Exchange Act of 1936 (the "CEA"). As a result, shareholders of GLDM do not have the protections associated with ownership of shares in an investment company registered under the 1940 Act or the protections afforded by the CEA.

GLDM shares trade like stocks, are subject to investment risk and will fluctuate in market value. The value of GLDM shares relates directly to the value of the gold held by GLDM (less its expenses), and fluctuations in the price of gold could materially and adversely affect an investment in the shares. The price received upon the sale of the shares, which trade at market price, may be more or less than the value of the gold represented by them. GLDM does not generate any income, and as GLDM regularly sells gold to pay for its ongoing expenses, the amount of gold represented by each Share will decline over time to that extent.
